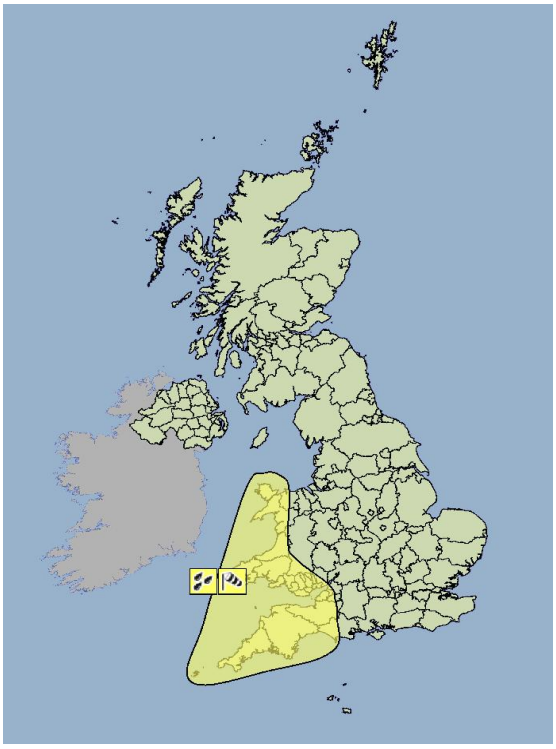
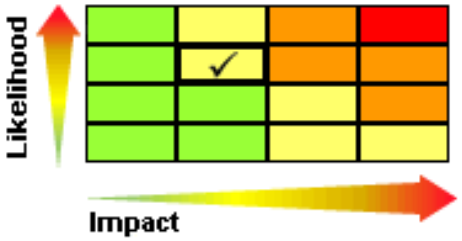
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of heavy rain, along with the possibility of hail and some hill snow, will move eastwards across Wales and southwest England early on Tuesday morning. 20 mm of rain is possible within 2-3 hours in some places, sufficient to cause some flooding of roads.

It will also be very windy, with the southerly wind expected to gust 50-60 mph widely and as high as 65-70 mph along some exposed coasts and over high ground. After a brief lull in winds, strong northerlies will follow with 55-65 mph possible across northwest Wales.

The Met Office have issued a **Yellow Warning** of **Rain and Wind**

Valid from **00:05 on Tue, 13th Feb 2018** until **10:00 on Tue, 13th Feb 2018**

Heavy rain and some very strong winds are expected early on Tuesday morning.

Some delays to road, rail and ferry transport are likely, including for high-sided vehicles on exposed routes and bridges. Spray and some flooding on roads will probably make journey times longer.
